

## TM-LRX

### Chameleon

- » Compact interactive keyboard module with dynamically alterable functions

## FEATURES

- » add-on module or standalone device (if a Tipro controller is integrated in)
- » dynamically changes its appearance and function
- » combination of 12 standard mechanical keys for quick data entry and 16 self-explanatory LCD keys with graphic display
- » different steady and alternating backlighting colours (RGB)
- » ergonomic and intuitive user guidance through a menu system
- » tactile feedback that a key has been activated
- » all keys are programmable in up to 24 pages/skins, both legends and contents
- » space saving - a few dozens of keys effectively converted into several hundreds
- » all settings permanently stored in internal non-volatile memory (library of icons/pictograms, key codes, backlighting)
- » powered from FREE+ 15 or BeFREE via Tipro Power Bus
