

TM-H Handset

» USB or analogue audio device.

FEATURES

- » Programmable Push To Talk or Push To Mute button
- » Programmable magnetic hook switch
- » 2 programmable RGB status LEDs
- » Keys and LEDs connected via Tipro bus to controller
- » Connection: USB (to the hub of the Tipro USB controller or directly to computer) or analogue to PC-telephone card (RJ 4P/4C connector)

The upper part of the handset housing is protected with a special coating in order to improve its abrasion resistance. The coating modifies the shade of the original black (C15) colour, what is referred to as C25 colour.

	Power consumption:	Dimensions:	Packaging dimensions:	Package content:
